Front-end Development

## WORK EXPERIENCE

### Front-End Developer intern

**EasyClick Computers**

June 2022 – September 2022 - Remote

- Cloned 3 real-life projects, Netflix and Udemy landing pages using HTML, Bootstrap, and CSS.

- Employed development tools like HTML, CSS, JavaScript, ReactJs, Netlify, Vercel, and Vs code to create over 15 projects.

- Worked together and provided ideas for improving application performance and user experience.

- Helped in identifying and resolving coding issues before deployment to production environments.

- Built an E-commerce fashion website for 3 categories (Fashion, Phones, and Electronics) where the clients can search for products available to purchase

### Front-End Developer intern

**OIC Hub LTD**

December 2022 - March 2023 - Remote

- Designed responsive web apps in collaboration with cross-functional teams to ensure smooth user experience on various platforms and devices.

- Developed and maintained web applications using JavaScript, HTML5, CSS3, Firebase.

- Created a text-to-speech web application.

- Used GitHub to learn how to work with repositories and code reviews.

- Maintain a constant attitude of positivity and cooperation while working with cross-platform teams.
  Designed and analyzed a web UI of 3 sign-in and sign-up pages with HTML, CSS, JavaScript, and ReactJs.

- Received mentorship from senior developers while improving my skills.

- Detailed the processes employed in the development environment in documentation.
